houses, have been thinned out, but many remain. The Australian and other large tree ferns are indeed in considerable strength. The most beautiful departments are those perhaps devoted to Camellias and Azaleas. The last named have always been pets of Mr. Buist, and he has endeavored to let no occasion pass by which he might add any novelty that was a real improvement. They were just then in full flower, and, though it is not easy for a Florist to hold on to his plants long enough to make fine specimens, there were many among these which would do no injustice to a first class floral exhibition.

The Orchid house is a great attraction to all lovers of these curious plants. It was full of rare kinds, and many of them valuable as specimens, independently of their merit as scarce species.

Many a time when people are selling out they expect to find only the dregs and refuse of private sales. Those who visit Rosedale nurseries during this, the closing out season, with this idea, will be much disappointed.
